

Connect and Control Bundle

The connect and control bundle is the ideal audio video solution for training facilities, and meeting rooms.

Cost effective and offering energy saving opportunities, this bundle is also easy to specify and simple to install.

The SPC6, Simple Projector Control, provides serial control in a cost effective, entry-level control interface for display devices including LCD and DLP Projectors as well as LCD and Plasma displays.

EPA-41, Euro Panel Amplifier, combines a 20 watt, 86% efficient class D stereo amplifier with two rear inputs and a front 3.5mm stereo jack on the front panel.

EP-PC50V, Euro Panel PC connector provides a HD15 connection for XVGA and gold plated phono socket for composite video and left/right audio.

Supplied with a 250mm flush mounting media enclosure with a white steel front faceplate complete with a 12V power supply.

IKON's extensive range of plates, panels and amplifiers also offers the opportunity to modify this bundle to meet specific requirements.

Benefits

- **Cost effective**
- **Easy to specify**
- **Easy to install**
- **Energy efficient**
- **Programmable and available pre-programmed**

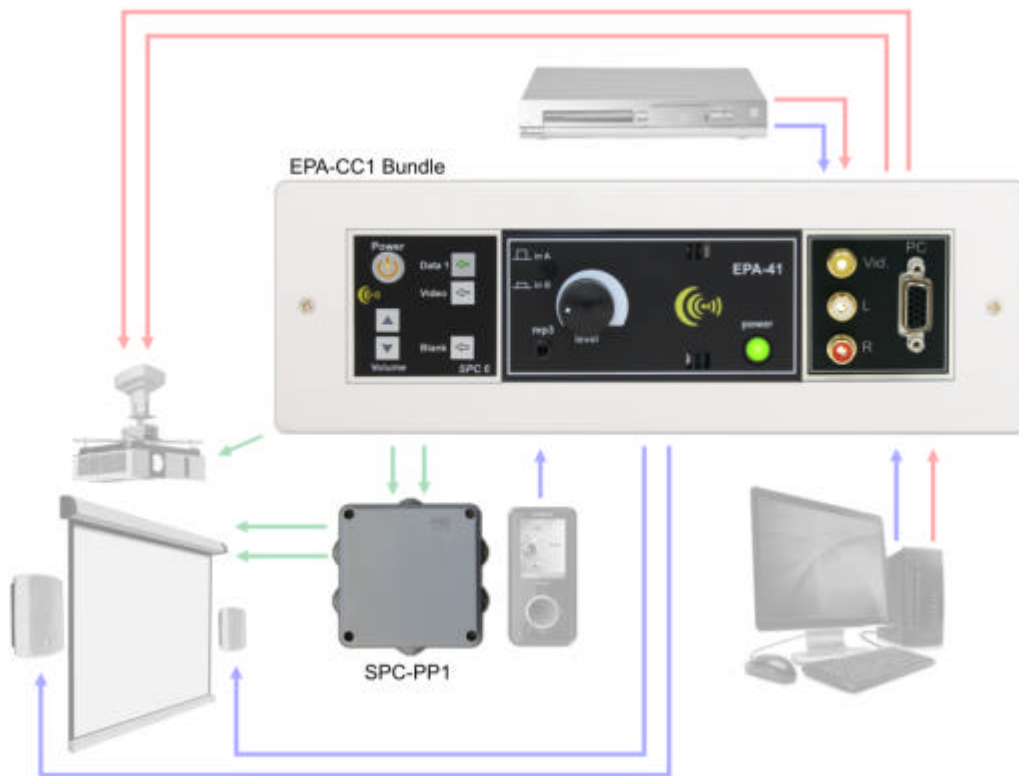

Energy Saving and Control

On the SPC an input is provided to enable: room occupancy shutdown via an external PIR sensor, panel lockout via a key switch, system shutdown via a volt-free contact, or shut down after a period of inactivity. The SPCs can also be integrated into a building management system. Using the SPC-PP1 power can be turned off to any connected displays.

To program the unit it is only necessary to download a library module for complete control over the display. Full customisation over input selection (e.g. warm up and cool down times) is also provided. For further control the installer can set up a four-button sequence to lock and unlock the panels operation.

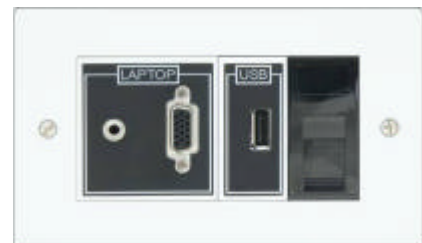

The EPA-41 twenty watt amplifier is an 86% efficient class D design offering higher quality sound with lower power usage.

Typical application

Accessories

The modular nature of many iKON ranges provides flexibility in specification of plates. Here is an input plate that could be used in conjunction with the EPA-CC1 bundle.

Technical Support

iKON technicians have over 100 years combined experience in the design and installation of audio and AV systems and we are here to provide you with specialist help and advice.
